

To whom it may concern,

I am a former student of Mr. Kevin Williams and I strongly recommend his Audio Engineering Program. With over two decades of real world experience in audio, Kevin's expertise is second to none. Kevin not only teaches the technical aspects of the recording arts, but also emphasizes the importance of music theory, creative listening, and music business. This makes Kevin an ideal teacher for students who are serious about starting a career in audio. Kevin also has a high track record of getting students employed.

Sincerely,
